English - professional working proficiency
Polish - limited working proficiency
German - limited working proficiency
Ukrainian - native proficiency
Russian - bilingual proficiency

VALENTYN KOLESNICHENKO

JavaScript Developer

Hello, I am a JavaScript developer with a Process Engineering background.
I started my development journey by building and deploying Configure | Price | Quote. The app optimizes preparing commercial quotations&invoices, document tracking and project management. It has been successfully running since the end of 2019.
I have hands-on experience and deployed projects using JavaScript, TypeScript, React, Redux, AJAX, Node, REST API and Responsive Web Design.
I am very passionate about my journey of becoming a full-stack software engineer.

Projects (clickable)

Personal Portfolio // Github

Description: Personal web-page, where I gather all my projects.

Technologies: JS, HTML&CSS.

Deployment: Gitpages

Travel Track // Github
