LANGUAGES

English - professional working proficiency
German - limited working proficiency
Ukrainian - native proficiency
Russian - bilingual proficiency
Polish - limited working proficiency

VALENTYN KOLESNICHENKO

JavaScript Developer

Hello, I am a junior web developer with a Process Engineering background.

I started my developing journey with building and deployment Configure | Price | Quote on Low Code. The app optimizes processes of preparing commercial quotations&invoices, document tracking and project management. It has been successfully running since the end of 2019.

See my project portfolio below.

I have experience in JS, responsive web design, Node.js, REST API and junior React skills.

I am very passionate about my journey of becoming a full-stack software engineer.

Projects (clickable)

Personal Portfolio // Github

Description: Personal web-page, where I gather all my projects.

Technologies: JS, HTML&CSS.

Deployment: Gitpages

Travel Track // Github
