Russian – bilingual proficiency
Polish – limited working proficiency

VALENTYN KOLESNICHENKO

Junior Front-End Developer

I have background in Process Engineering and qualified in CAD process design. For last 2 years I am handling business processes and automation.
The biggest programming achievements so far are developing and implementing CPQ app (Configure | Price | Quote) and SOPI app (Sales Orders Proforma Invoice) for my team to optimize the most consuming business flows: commercial quotations, invoice preparation, document tracking and project management.
At this moment searching for opportunities to continue my journey becoming full stack software engineer.

ACHIEVEMENTS

Developed and implemented Configure Price Quote App
◦ Customer and Project management.
◦ Product and quotation configuration module.
◦ Integrated .pdf print and One Drive file storing.
◦ Email module.
◦ Excel export data generation.
◦ See more CPQ

Developed and implemented

Sales, Ordering, Purchasing and Invoicing App
◦ Order management
◦ Sales documents preparation and tracking
◦ Document printing, One Drive and Outlook integration
